

## GROUP I.Q.

**Directions:** With your group, read each statement below to determine the number of points your group can score and write the number in the points column. When your points column is filled, add all points together to find your TOTAL points – fill this number in the blank provided. You might be asked to prove any one of the characteristics, so ask if you are unsure.

Example: One point for each brother and sister. Sue has 1 bro and 1 sis, Tom is a twin, Anne is an only child, Tom has 5 siblings...the total is 8.
